

Since 1985 **WIKO**  **Technik**
Folientastaturen Hamburg produces membrane switches, front plates and displays in Hamburg. Having newest production plants in the areas of reprographic and screen printing as well as CNC- milling, lasing, punching and stamping Wiko Technik provides high standards in every production area. These high standards are based on high- quality material, whereby the products of Wiko Technik fulfil the highest demands. The executive vertical range of production gives Wiko Technik the possibility to realise flexibility and short passage times. Flexibility, short passage times, an up to date production philosophy and a high level of reliability for the overall satisfaction of our clients.
